Summary

Software Engineer with 2+ years of experience building and documenting scalable backend systems, real-time communication platforms, and AI-powered applications. Experienced in WebRTC, distributed systems, databases, CI/CD, and LLM-based solutions in highly concurrent environments. Strong problem-solving skills with solid foundations in data structures, system design, and high-performance application development.

Work Experience

Samsung R & D Institute

Jan 2024 – Present

Software Engineer

Location- Noida, Uttar Pradesh

- Optimized scalable real-time communication infrastructure using WebRTC and Media soup SFU, reducing end-to-end latency by 25% and improving throughput by 40% for concurrent streaming workloads.
- Redesigned asynchronous update system using WebSocket/IPC for distributed applications, reducing deployment time by 50% and network traffic by 35%.
- Implemented an Android-based RAG content-generation system, improving creation speed by 30%
- Led DotNET migration of Signage TV, Flip, and Hotel TV launch pages, improving startup speed and runtime stability
- **Technologies:** C++, React.js, JavaScript, LLMs, Socket.io, WebRTC, SFU, Media soup, C#, Git, DBMS

Morgan Stanley

Jan 2023 – July 2023

Software Engineer Intern

Location- Bengaluru, Karnataka

- Automated a report filing system that eliminated third-party dependencies, reducing licensing costs by 20%
- Accelerated time-to-market by 30% through streamlined report-generation workflows
- Built and reviewed backend services handling 110,000+ annual requests with 99.8% uptime
- **Technologies:** Spring Boot, React, Kubernetes, Docker, Camunda, Jenkins, PostgreSQL

Skills

Languages: C++, Java, Python, JavaScript, SQL

Backend: Spring Boot, Node.js, RESTful APIs, WebSockets, Microservices, SDLC

Database Technology: SQLite, MySQL, MongoDB, PostgreSQL, Vector Database, Redis, Kafka

Cloud, DevOps & CI/CD: Docker, Kubernetes, AWS, Jenkins, Git, Linux

System & Concepts: Distributed Systems, WebRTC, System Design, Multithreading, OOP, Concurrency Design, Caching

Projects

Secure Multithreaded FTP System

C++ • OpenSSL • SQLite • Z-Library

- Designed a multithreaded FTP server that handled 100+ concurrent clients via thread pools
- Secured communications with TLS/SSL encryption (OpenSSL) and PBKDF2 authentication
- Enhanced transfer efficiency by over 30% using Z-Library compression
- Integrated SQLite for persistent user session management

Spotify Analytics Platform

Flask • Pandas • OAuth • Machine Learning

- Built a cosine similarity-based recommendation engine for personalized suggestions across 50,000+ songs
- Visualized user listening patterns through interactive dashboards (top tracks/artists/genres)
- Built a shareable stats feature that generated exportable image summaries

Achievements

- 5-Star rating on CodeChef
- Codeforces max rating: 1484
- Ranked #112 globally (Division 2) in CodeChef Starters 43 among 10,000+ participants

Education

J.C. Bose University of Science and Technology

July 2019 – July 2023

B.Tech. Information Technology — CGPA: 8.53/10.00
